

Baywatchers

Buzzards Bay Citizens' Water Quality Monitoring Program

2024 Volunteer Training Schedule

Training usually takes between 60-90 minutes for everyone to review sampling methods, hand out equipment, answer questions and give out supplies (new test kit chemicals and data sheets). You may attend any session that is most convenient for you.

If you cannot make any of these sessions, please email to arrange a time to come by Marion for a kit, supplies and to review the sampling procedure.

All trainings will be held at Marion Science and Field Operations Facility, 173 Spring Street, Marion.

Date	Time
Monday, May 20	5:00pm
Tuesday, May 21	5:00pm
Wednesday, May 22	10:00am
Thursday, May 23	10:00am

If you have your kit, please bring it so we can check and restock it.

All volunteers will follow a dissolved oxygen and salinity analysis.

It is important that *everyone* review the sampling techniques each year for our EPA and state-approved monitoring plan.

Looking forward to another great summer.
Thank-you for your help monitoring the Bay.
