

Franciscan CARE PLUS

Supporting you through life's toughest challenges

CARE is an acronym for **CARE** through **Advocacy, Resources** and **Education**. The PLUS represents the ever-expanding community-based services St. Francis Healthcare System offers you and your loved ones.

This program pairs an individual and the individual's family with an experienced social worker who is dedicated to being their personal coach, their health care advocate and their expert to put them in touch with available community services as the need arises.

As a sponsor of the 2022 St. Francis of Assisi Spirit Award Wine Gala, we are pleased to offer this benefit to your organization.

For more information to begin offering this program to your employees, please contact Jerry Correa at JCorrea@stfrancishawaii.org.

HEALTHCARE FOUNDATION OF HAWAII

A Legacy of Caring for Hawaii's People

Live Every Moment

Franciscan CARE PLUS

Supporting you through life's toughest challenges

CARE stands for Care through Advocacy, Resources and Education. Franciscan CARE Plus is a home-based service that helps you and your family address the challenges that prevent you from achieving healthier outcomes, aging in place, and living every moment.

“ St. Francis paired Dad and me with an experienced social worker. She was dedicated to being our personal coach, encouraging me as a caregiver and serving as Dad’s health care advocate. It was so valuable to have an expert help us navigate community resources. ”

Your social worker will create a comprehensive care plan based on your unique situation, your values, and your goals.

HEALTHCARE SYSTEM OF HAWAII

A Legacy of Caring for Hawaii's People

Live Every Moment

A Comprehensive Care Plan Tailored for You

Franciscan CARE Plus includes the following services:

- Coordinating transitions of care from the hospital or a care facility to your home
- Assistance with navigating the healthcare system, advocacy on your behalf, and coordination of your care with your healthcare providers
- Disease process education to assist in long term care planning
- Advance Health Care Directives to allow your family to know and follow your wishes
- Caregiver education, training and support
- Assistance with applications for Medicaid services
- Assessments for language, cognitive or literacy barriers that may impede decision making or problem solving
- Initiating and completing referrals for in-home community services (bathing, home-delivered meals, transportation etc.)
- Assistance with placement in care facilities
