

Rob Lutterman - Ski for a Cure Over \$1.2 Million Raised for Research!

On July 28th 1999, Rob Lutterman lost his battle with pancreatic cancer; he was 63. Shortly afterward, his family and a group of special friends decided to create an annual Ski Day to celebrate life, to raise money for cancer research and most importantly, to commemorate Rob, who was an avid skier. The **Rob**

Lutterman Memorial Fund for the Cancer Research Society was created to promote and fund research into pancreatic cancer.

Through generous donations, like yours, to the Ski for a Cure event, and with the help of the Cancer Research Society, the **Rob Lutterman Memorial Fund** has thus far awarded **over \$1.2 million** to pancreatic cancer research.

Your donations make a difference.

The funding of promising research, as well as future pioneering work in the field, is made possible through the Ski Day appeal and donations received throughout the year. Please visit www.skiforcure.ca to make a contribution.

Consider a donation in honour/in memory of a loved one.

We will acknowledge these special donations. Please use the attached form to join us in our fight against cancer and to support invaluable pancreatic cancer research.

Join us!

On **Saturday, February 17th 2018**, on the slopes of **Mont Sutton**, registration will begin at 9 a.m. in the chalet. To reserve your tickets, please complete the attached response form.

What is pancreatic cancer?

Pancreatic cancer is a type of cancer that starts in the cells of the pancreas, the organ that produces digestive enzymes and insulin.

Because the early stages of pancreatic cancer do not often cause symptoms, it is occasionally referred to as the "silent killer." Pancreatic cancer is mostly diagnosed at an advanced stage of the disease, so the prognosis is generally devastating.

Highlights :

Because of its low survival rate, pancreatic cancer is the fourth leading cause of cancer death for both sexes.

5 500 new cases will be diagnosed this year.

4 800 patients will die of the disease.

1 in 74 men and **1 in 72 women** risk developing pancreatic cancer in their lifetime.

1 in 72 men and **1 in 66 women** will lose their battle to this disease.

The 5-year survival rate is very low at **8%**.

Choose the Cancer Research Society

For its commitment and passion

The Cancer Research Society is a national not-for-profit organization whose sole mission is to fund research on all types of cancer, thereby contributing to the advancement of science aimed at preventing and treating this disease.

The Cancer Research Society works earnestly, with conviction and passion, to foster new discoveries that can make a difference.

For its expertise, its excellence and its ingenuity

The Cancer Research Society possesses scientific expertise in entirely administering grant applications - a source of reference for others.

The Cancer Research Society finances research on all types of cancer and supports the best researchers in hospitals and universities throughout Canada.

For its cause, one that affects the majority of the population

Cancer is the disease Canadians fear most. According to recent statistics, cancer is the leading cause of mortality in the country.

About 1 out of every 2 persons will develop some type of cancer over their lifetime.

Every 7 minutes, a person dies from this disease.
